EAST GERMANY

MILITARY

Soviet activity at KIRCHMOESER and MAGDEBURG (Apr - 10 Jul 58)

MAGDEBURG 1.

The type of shell used during firing practice at the GROSSEN KRAKAUER ANGER varies according to the target. Shells fired at tanks on the move explode on impact either on the tank or on the ground. exploding on the ground a very shallow shell hole is formed. practice takes place with shrapnel against infantry who take cover in previously dug trenches as soon as they arrive at the firing range, carried by tanks.

KIRCHMOESER 2.

The tracked amphibians off-loaded at the Russian tank repair workshop on 4 Jun 58 were cleaned and oiled and greased and left on 6 June 58 in an unknown direction.

- there is Within the tank repair workshop 3. a rectangular earth wall roughly 200-250 metres long and 120 metres wide. The earth wall is sloped on the outside and sown with grass. It stands 6 metres high. The wall has barbed wire on top; the inside is of concrete, in which there are gates, approximately 4 metres wide.
- There is only one entrance to this complex from the north where a 4. Through this door an open area can be manned watch tower is situated. seen with two red-painted hydrants and several ZIS-151.
